Who we are & what we provide

Founding

Everywhere's Local was founded in September 2005 by Joshua Rodgers to provide a one-stop site for every location in the world.

Services

Our primary service is a community focused online classified site that's maintained by visitors. Every town in the world can have it's own classified page with us.

Anniversaries, garage sales, housing or jobs can be posted. News, weather and ticket information is also available if provided by visitors.

Anyone can browse or post to our site. All posts, other than business specific items, are free to post.

In the future, our company will have facilities throughout the world, each providing services to the local communities.

Our Mission

To leave the world better off than we found it.

Our policy for helping out communities involves donating 35% of our profits to communities where we have offices; (some going to global benefits), and 25% of the 35% going to the community where the funds were received.

Money that we donate is done to help the people, not for tax-deduction purposes. The people gave us money, so we believe in giving back to them.

We also believe in creating jobs anywhere we have offices. As we grow, each office building that we build will serve as a mini-town, with other businesses, restaurants, and merchandise.

We also believe in keeping employees happy and able to survive in the world. To accomplish this, we have a minimum wage of \$10/hr for all employees, or 150% of minimum wage if the minimum is \$9 or more. In addition, 40% of our employees will be salaried, not hourly.

Future

We have plans to open up facilities opened up to the communities featuring the following:

- Rental Space
- Business Incubators
- Food court
- Exercise rooms
- Indoor and Outdoor tennis, basketball, racquetball, track, pool

We also plan on purchasing and renovating or building new houses, and small subdivisions for sale and rental. Along these lines, we will also have funds allocated (from the 35%) to be given to help homeowners improve their houses if in disrepair.
